### About This Game

"Paradise Checkers" is a board game put in VR environment,  
The game consists of two difficulty levels - "min" for beginners and "max" for more advanced players.  
You can also choose the color of your pawns as black or white

Your pawns are at the bottom of the board.  
In your turns you move one of your pawns diagonally to one of the nearest squares.  
You can destroy an enemy's pawn by jumping diagonally over it.  
Note: If you can destroy an enemy's pawn you MUST do it. That's the rule.  
If any of your pawns reach the opposite end of the board, it changes itself into a queen pawn.  
From now on it can move diagonally by any number of squares and also destroy an enemy's pawn that way.  
You win a game when there are no other figures except yours.

Game AI is poor but will be better and we have plans to do multiplayer mode, but don't promise!  
And still may occur a little error, if you find some please give me a message,
